

# Drainage Inspection Questionnaire

**Please read before you fill out the form below:**

Thank you for seeking our help. We have completed thousands of drainage assessments in Canterbury, so we are highly experienced. We understand you may not have all the relevant information to complete the questionnaire but no problem! We can help guide you along the way to get the accurate information necessary to get underway. Unfortunately, we have received the occasional questionnaire with deliberately misleading information which can result in a lot of time being wasted for all parties involved. Whilst we can generally and quickly differentiate between honest and dishonest applications, we reserve the right to recover the cost for time committed to any applicant that has sought to intentionally mislead us.

Please note, if you have a current blockage this will need to be cleared before we can put our camera down. We can do this for a small charge, or you can arrange another contractor to unblock and we can come back once the drain is cleared. If the blockage is due to EQ damage you may be able to submit this into EQC to recover your cost.

The drainage inspection itself is free of charge to you providing you have clay type pipes (EW) and a valid EQC claim number (does not need to be a drainage claim, just any EQ claim at your property).

Owner and Property Details	
Full Name/s of Owner/s:	Address:
Phone Number/s:	Email:
